

LOGIC BEACH, Inc.

Instruments designed with the User in mind

SOFTWARE RELEASE NOTES

Product: IntelliLogger Firmware, Version 1.17.5.19

Release Date: 2-4-2010

FIRMWARE COMPATIBILITY:

This firmware release is compatible with HyperWare-II versions containing '17' as the second digit in the HyperWare-II version number.

Note: It is always recommended to update IntelliLogger firmware and HyperWare-II to the latest version if possible.

MODIFICATIONS CONTAINED IN THIS CODE SET:

Rewrote FTP client in order to drastically increase client robustness and improve error handling.

Implemented watchdog timer functionality in order to prevent rare instances of the IL locking up and becoming unresponsive.

Fixed a recently introduced issue that could cause CRC errors to be generated when converting raw data files to text files in HyperWare.

Fixed a problem where the FTP retry interval being used by the IL was 60 times longer than what was entered in HyperWare. This was due to a minutes vs. seconds mismatch.
